## User journey

Diffi Beai

Difficulty

Creating a user journey is a quick way to help you and your team gain a deeper understanding of who you're designing for, aka the stakeholder in your project. The information you add here should be representative of the observations and research you've done about your users.  $\triangleright$ 

1 Phases	Create the user	Setting up details of bank accounts and	Entering income  details to track how  much they spend and	Attaching mail account in order to receive reports over a week / month / year according to their preference
h-level steps your user needs to omplish from start to finish	account	other finance sources	much they spend and save	month / year according to their preference
Steps	User mobile	Entering the	Croating	Analyzing the
tailed actions your user has to	User mobile number/email to create account	expenses	Creating categories	Analyzing the reports in intervals to get an idea of where they are
form	the profile	track of them	for expenses	spending their money
Feelings	It is easy to			I can use the
	It is easy to create	May be I should stop spending	I can see where my	reports to design the
hat your user might be thinking and	account with	my money on	money is	budget better
eling at the moment	number	expenses)	going	this time
	Is it secure to	Vocasina trada	user interface	Looking into the
	include my	Reeping udck		expenses and figuring
